

**Amendments to the Specification:**

Please replace the paragraph on page 6, lines 13-26, with the following redlined paragraph.

The storage medium 104 may also ~~include~~store a browser 120 for permitting the device 100 to access and exchange data with sources such as web sites of the Internet, corporate intranets, or other networks as described below, as well as other server applications on server computers. The browser 120 in the depicted embodiment is markup language based, such as Hypertext Markup Language (HTML), Extensible Markup Language (XML) or Wireless Markup Language (WML), and operates with markup languages that use syntactically delimited characters added to the data of a document to represent the structure of the document. A number of Web clients or browsers are commercially available such as NETSCAPE NAVIGATOR<sup>®</sup> from America Online, and INTERNET EXPLORER<sup>®</sup> available from Microsoft Corporation of Redmond, Washington. While shown in Figure 1 as being stored in the storage medium 104, the operating system 112, application programs 114, other programs/modules 116, program data 118, browser 120, and/or other elements can be stored elsewhere in the device 100.

Please delete the paragraph on page 15, lines 18-21.
